SKILLS, ACHIEVEMENTS & OTHER EXPERIENCE

- **Human Computer Interaction Course Project (2022)** : Making a new innovation in the form of an Islamic application to help people learn to recite Al – Qur'an and make it easier for people to memorize Al- Qur'an. This project requires my team to brainstorm, find data, process data, and also make the UI/UX of the application as a demonstration.
- **Web Application Development Course Project (2022)** : Design and create an Android-based application using Android Studio and the Java programming language. In this project, I created an e-commerce application that sells shoe products with several UI/UX views and also the features that are present in my application
- **Business Plan Project (2022)** : Designing a new innovation in the property business. An application called e-Land that offers convenience and a new experience in doing business in the property sector. Digital Land Certificate feature that uses a blockchain security system. Besides that, my team designed this application in such a way as to be able to reduce land dispute conflicts in Indonesia.
